

1. Introduction

The Electronics Lighthouse project aims to develop a sophisticated e-commerce application specifically designed for the electronics industry. This platform will provide a seamless and user-friendly experience for both consumers and vendors, offering a wide range of electronic products and services.

1.1. Purpose

Electronic Lighthouse is a comprehensive e-commerce solution that caters to the needs of electronics enthusiasts, professionals, and businesses. The platform will feature a diverse range of electronic products, components, and services, making it a one-stop shop for all things related to electronics.

1.3Intended Audience & Reading Suggestions

1.4. Project Scope

Our E-commerce application, "Electronics Lighthouse," will be designed to offer an extensive array of electronic products, ranging from consumer electronics like smartphones, laptops, and smart gadgets to industrial components, electronic components, and embedded systems. This platform will be characterized by its user-centric design, scalability, and innovative features to enhance the online shopping experience for all stakeholders.
